## 6HX19-6.15 STUDENT SUSPENSION AND DISMISSAL – LIMITED ACCESS PROGRAMS

Students enrolled in limited-access workforce and health-related programs may be suspended from program or clinical activities or dismissed from a program for failure to satisfy applicable academic, clinical, technical, professional, safety, or other program requirements.

The President is authorized to establish administrative procedures governing the grounds and process for program suspension and dismissal. Such procedures shall provide students with notice of the basis for proposed dismissal and a meaningful opportunity to respond before a final determination is made.

The President or designee may authorize the immediate temporary removal of a student from clinical or other program activities when reasonably necessary to protect the health, safety, or welfare of others or to address other circumstances warranting immediate action. Such temporary removal shall be governed by the applicable administrative procedures and shall not constitute a final determination regarding program dismissal.
